ENERGY

We deliver energy solutions for difficult to reach or remote locations, as well as helping small companies and private households to reduce their carbon footprint. Our mast applications include solar panels, small wind turbines and weather stations for:

- Utility companies
- Renewable energy companies
- Met Office
- Universities
- Small businesses
- Individuals

Facilitating low power operation, our bespoke masts:

- allow solar panels or wind turbines to provide power, instead of sending full energy
- allow energy readings to be sent using WiFi
- are tailor made to fit any space or area
- can be static or mobile, grounded or wall mounted

AMATEUR RADIO

Tennamast products are the number one choice of amateur radio enthusiasts operating across the globe. Well known in the amateur radio community for offering the best solutions for quality, performance and durability, we also meet their requirements for:

- a wide choice of quality products
- a high level of customer service
- value for money
- fast delivery time

Available to suit almost any size of garden or installation type, our masts:

- are relatively discreet in your garden
- can be easily lowered when not in use
- can be tilted over for easy maintenance of antennas or antenna adjustments
- have a galvanised finish to ensure long life

THE TENNAMAST GUARANTEE

Every Tennamast product is fully tested before leaving our premises. However, if you are not completely satisfied with your mast, we promise to replace it completely free of charge to demonstrate our commitment to both quality and customer service. We are the only mast manufacturer in the UK to offer a guarantee of this kind.

EXCELLENCE. INNOVATION. PERFORMANCE

TENNAMAST

Tennamast is a leading manufacturer of permanent and mobile masts for both commercial and domestic use. Driven by excellence and innovation, we are recognised globally for setting new standards in the creation of top quality mast products which offer high performance, exceptional durability and value for money.

WHY CHOOSE TENNAMAST?

Quality

At Tennamast, quality is guaranteed by our stringent inhouse controls for materials and manufacture. Matching the best materials on the market with skilled, precision engineering ensures our masts offer maximum reliability and durability. Able to withstand even the severest climatic conditions, including windspeeds of up to 150kph, all our products are fully galvanised to British Standards ISO 1461. We also assemble and test each one of our products on site before delivery.

Design

Our simple but careful design features for tilt over and telescopic masts ensure optimum performance, safety and ease of use. Nylon top sleeves reduce friction, giving longer life and reducing the need for maintenance, while the unique nylon pulley allows the mast to be easily operated by one person. Our tilt over masts automatically self-lock in the vertical position to ensure safe operation. They can also be safely maintained at ground level.

Service

As a small company with a global reputation, we provide our customers with a highly personal, flexible and expert service. With unrivalled knowledge and expertise in our field, we give the same meticulous attention to detail to each one of our orders, while offering our customers value for money and a choice of delivery options. We can also create bespoke solutions to your individual specification for just a minimal additional cost.

SPECIALIST SECTORS

COMMUNICATION/BROADBAND

We deliver communication solutions to commercial organisations and public services. Our mast applications include satellite dishes, mobile phone receivers and antennae or dish repeaters for:

- Telecom companies
- Broadband companies
- Police, fire & emergency services
- Mountain rescue
- Lifeboat service
- British Waterways
- Clydeport Authority
- Ministry of Defence

Through providing mobile signals and WiFi, our bespoke masts:

- offer emergency communication from difficult to reach or remote places - even the top of a mountain
- range from 1m - 30m tall
- can be grounded, wall mounted or trailer based

SECURITY

We deliver security solutions for a wide range of facilities and locations. Our mast applications include CCTV cameras, lighting and sensors for:

- Local government
- Car parks
- Town/city centres
- Train & bus stations
- Airports
- Shopping centres
- Schools & further education
- Parks

Dealing directly with security contractors, our bespoke masts:

- can be designed to either fit in discreetly with their environment or provide an ornamental/architectural feature
- are powder coated or painted in any colour
- can be wall mounted or grounded
- are supplied with all auxiliary fittings and bracketry

TRAFFIC MANAGEMENT

We deliver a wide range of traffic management solutions for land, water and air transport across the UK, Ireland and further afield. Our mast applications include:

- Wind socks for most UK airports and also helipads
- CCTV, road signs and traffic calming for motorways
- Weather stations in UK & Ireland
- Waterways and canals
- Number plate recognition
- Navigation lights

Setting new standards in traffic management, our bespoke masts:

- can be galvanised powder coated or painted any colour to fit their environment
- are supplied with all auxiliary equipment
